They are not trained to reduce inventories or assist customers in lowering total costs associated with the acquisition of their product lines. The removal of the influence of the route sales agent will keep purchasing control in the hands of Customer rather than the supplier. The result is the ability to maintain practical, cost effective inventory levels at each location. Imperial Supplies also offers Barcode Technology, detailed, Custom Reporting, EDI Capabilities, Customer Corporate Programs, Fully Integrated Chemical Program, and Product Recommendation and Standardization Programs.</p>
