

Environment, Health and Safety Solution Brief

Creating a safe and productive workplace that's free from preventable incidents and accidents requires more than just sending your employees through training and displaying safety posters in the breakroom.

Instead, develop a comprehensive Environment, Health and Safety program (or EHS program for short) that harnesses technology, best practices, and the concerted efforts of your workforce to maintain a safe and productive workplace.

What's at Risk with an Unsafe Workplace?

Start with the most obvious answer: the safety and well-being of your employees.

In 2017 over 5,000 workers were killed on the job and more than twice that number were seriously injured.¹

What else is at risk? Your bottom line.

Lost productivity, high insurance premiums from Worker's Compensation claims, litigation, and fines all eat into your profits and increase your total cost of risk.

And, how about your reputation?

Serious injuries and fatalities become a matter of public record. Both customers and employees old and new steer clear of companies with reputations for unsafe workplaces.

Your Bottom Line: Know Your Ex-Mod

Did you know that your experience modifier (or Ex-Mod) impacts your insurance costs?

The ex-mod is a score usually between .08-1.2 that rises if your company has more worker's compensation claims than the industry average.

Your insurance provider multiplies your base premium by your Ex-Mod score, then sends you the bill.

Maintaining a safe workplace keeps your Ex-Mod low and your insurance costs under control.

EHS Compliance Best Practices

Managing EHS compliance can be challenging, but it's critical to an organization's bottom line. KPA's online and on-call solutions provide the right combination of expertise, compliance programs, interactive training, and facility audit support to help clients do this. With KPA, Safety professionals have one place for your giant list of EHS program essentials:

Issue tracking

Accident management

SDS access

Environmental reporting

Claims management

Mock OSHA inspections

Hazard communication

Online training

And, since accidents don't happen when you're at your desk, use the mobile app to record inspections and audits in real time. No other solution in the SMB market can offer these capabilities in one system.

With KPA's solution, you can:

Automate Manual Processes

Shift your attention from manual processes and focus instead on creating and maintaining a culture of safety using KPA's EHS management platform. When you spend less time on paperwork, spreadsheets & reporting you have more time to spend in the field with your team: conducting inspections, audits, safety meetings, and training employees.

Reduce Total Cost of Risk (Insurance Premiums, Claims, Fine Avoidance)

Workplace accidents and injuries, worker's comp costs, and insurance premiums all contribute to your total cost of risk. KPA helps you control those costs by keeping your workforce in compliance with OSHA, DOL, NIOSH and other regulatory standards.

Manage Safety in One Comprehensive Platform

In a single system:

Employees login to complete safety training, access Safety Data Sheets, read and understand policies, and report incidents and accidents.

Managers track inspection results, employee training records, accidents, and overall compliance status.

Safety managers can complete audits and corrective actions and then view a roll-up of these activities that can be compared across departments or facilities.

With this insight, program managers have complete view of safety trends and areas where they can improve. And they have the peace of mind that nothing falls through the cracks.

myKPAonline, provides the backbone of your EHS Compliance Program

Issue Management

Issue Management

There are hundreds of potential risks in your facility that should be addressed before they result in an injury. As a safety professional, your job is to find and fix these issues. It's a continuous game of whack-a-mole.

KPA's issue management tools help you document these issues and create a plan to address them. Describe the issue, select a level of severity, assign an owner and determine the fix-by date. Even document the issue with a photo from your phone and upload it into the system. Now that you've logged the issue, the system gives you a list of recommended steps to help you resolve it.

And, schedule and track activities such as safety meetings, equipment inspections, and chemical inventory review. The system stores checklists, meeting minutes and inventory reports system for easy access.

Safety Data Sheet

Section 1: Identification of the substance or mixture and of the supplier

Product Name:	Honda Genuine Synthetic Blend Motor Oil 817720
SDS Number:	
Synonyms/Other Means of Identification:	Honda Genuine Synthetic Blend Motor Oil, SAE 0W-20 Honda Genuine Synthetic Blend Motor Oil, SAE 5W-20 Honda Genuine Synthetic Blend Motor Oil, SAE 5W-30 Honda Genuine Synthetic Blend Motor Oil, SAE 10W-30
Intended Use:	Automotive Engine Oil
Manufacturer:	Phillips 66 Lubricants P.O. Box 4428 Houston, TX 77210
Emergency Health and Safety Number:	Chemtrec: 800-424-9300 (24 Hours)
Customer Service:	U.S.: 1-800-822-6457 or International: +1-83-2486-3363
Technical Information:	1-877-445-9198
SDS Information:	Phone: 800-762-0942 Email: SDS@P66.com URL: www.Phillips66.com

SDS Management and Chemical Inventory

If your employee was exposed to a hazardous substance, could your staff locate the Safety Data Sheet within 5 minutes?

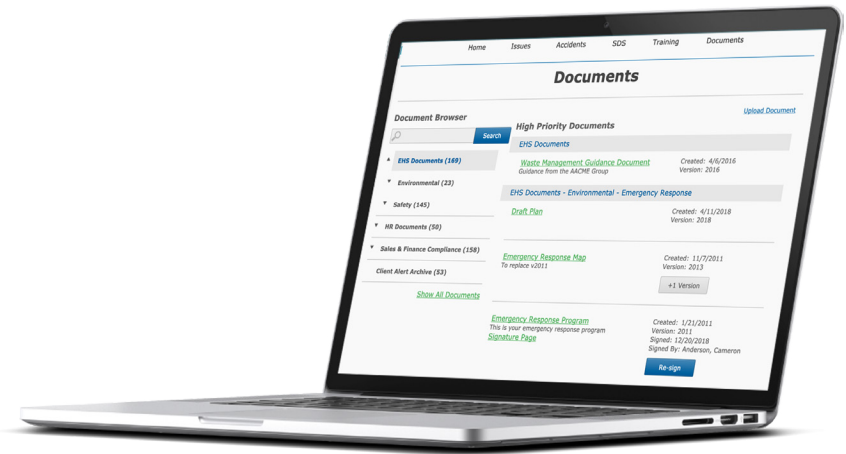

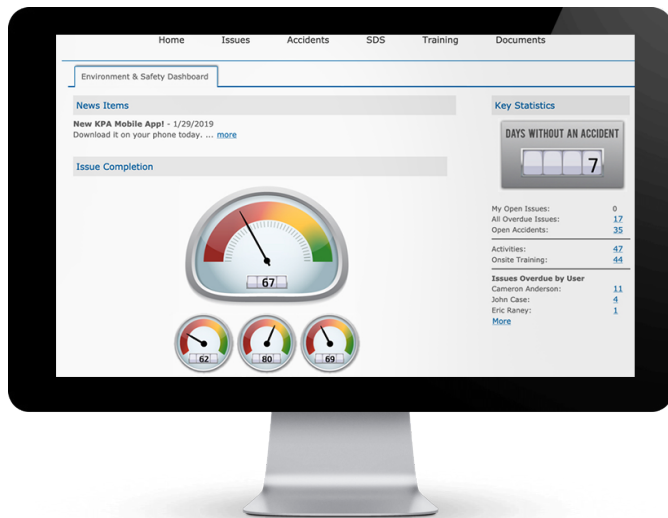

Store your SDS library in an easy to access online repository with myKPAonline. Post the login and password to your account in a conspicuous place so any employee can pull an SDS easily.

Minutes count when responding to hazardous materials incidents. You need to know exactly what to do as quickly as possible to remediate them.

Dashboard & Record Keeping

View compliance levels across the organization through the interactive dashboard. View levels segmented by safety, environmental and regulatory. With a click, see Open Issues, Overdue Issues and Open Accidents. Drill down to overdue issues by owner as well.

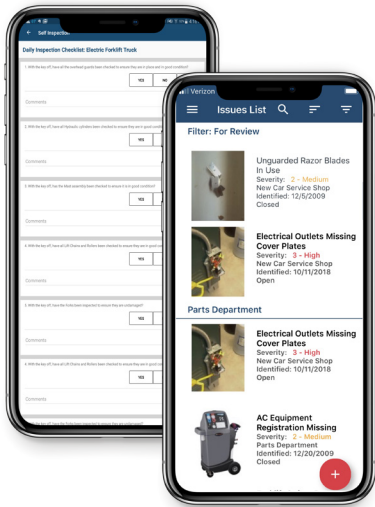

Resources and Document Libraries

Store all of your Safety-related documentation in myKPAonline, including:

- Illness and Injury Prevention Plan
- Facility Inspection Checklist
- SPCC Plan
- Emergency Response Plan
- OSHA Forms
- Written Forklift Training Program
