KEYper MX
Track Your Keys

MX Electronic Key Systems

KEYper MX+
Track Your Keys

The KEYper MX Electronic Key System provides a revolutionary method of key and asset management designed to fit the needs of all industries while providing the ultimate solution in accountability, analytics, security, and asset control. KEYper MX key systems can be customized to fit the needs of your organization ranging from 32 to 288 keys per cabinet, and can easily be expanded to more than 2,000 total keys. KEYper MX key systems can be easily wall-mounted or configured as a free-standing system. The system provides a complete audit trail of your keys and assets. You will always know who has your keys, when they took them, and why. The KEYper MX key system also offers a wide array of features and add-ons to meet your organization's needs.

- **Web-Based Administration**
- **Customized Reporting**
- **Email SMS/Alerts**
- **Digital Photo Capture**
- **Multiple Access Options** (PIN, Biometric, Proximity Cards)
- **And Much More**

The KEYper MX+ Electronic Key System expands the capabilities of the MX+ System. It contains all the innovative features of the MX system while taking security to the next level by electro-mechanically locking each key in place. The KEYper MX+ is ideal for your keys and assets that require the highest level of security and accountability. Like all Elite Series Electronic Key Management Systems, the KEYper MX+ can be customized to meet your key and asset management needs and will grow with your organization, with industry-leading storage and expansion capabilities.

- **Each Key Electromechanically Locked in Place**
- **Restrict Access by User, Key or Cabinet**
- **Visual and Audible Alarms**
- **Emergency Key Release Capability**
- **Networking, Integration, API**

Features And Add-Ons

Fleet Management
Increase the efficiency and operation of your fleet! Track odometer statements and daily usage of your fleet vehicles. Assign vehicle reservations for quick and easy pickup.

Lot Blocking
Use our Lot Blocking system to help identify vehicles that may be blocked by multiple vehicles. Also identify the exact lot location of any given vehicle.

Digital Camera
For added security, each transaction on the Elite Series Key System is photographed and time/date stamped for identity verification.

Prox Card
Do you already have identification cards within your organization? A Prox or Swipe Card reader can be integrated into the Key Systems to read your existing identification cards.

DMS Integration
KEYper® has partnered with Dealer Downloads, providing the ability to import your vehicles from most DMS Providers.

Label Printer
Use the KEYper® Label Printer to print various labels for your vehicles and equipment. Incorporate a barcode onto the label and use the KEYperSCAN (Pages 12-13).

Multi System Networking
Link multiple systems throughout your organization. Keys and users can then float throughout multiple key systems for added convenience, storage and reporting.

Emergency Key Mapping
In the event of complete power loss, our emergency key mapping system will allow you to download, straight to your smart phone, the exact location of the key within the cabinet.

KEYper HC
Key Control for Property Management

KEYper HC is the premier Electronic Key Management System designed exclusively to meet the key control needs of the property management industry. Using our SmartFobs, this high-capacity system is capable of securing and tracking up to 504 keys per cabinet. Additional cabinets can easily be added to expand the system. As an added security measure, access is granted to authorized users only, and requires a PIN or Biometric Fingerprint. Keys are checked out using the integrated touchscreen, and red lights visually indicate the location of the key inside the cabinet. Easy-to-use software allows keys to be tracked in real-time, and provides a full audit trail of key, asset and user activity. With KEYper HC, you'll know who has the keys to your properties, when they took them, and why!

Ideal Solution for:
• **Residential**
• **Multi-family**
• **Condominiums**
• **Apartments**
• **Real Estate/Rentals**

Smart Fob Reader

The Perfect Addition to the KEYper HC Electronic Key Management system is our industry exclusive KEYper Fob ID Smart Fob Reader. This device allows your users to identify which keys they have in their possession while on the go. The LCD display of the Smart Fob Reader will briefly display the unit number or asset name that is programmed to the KEYper Smart Fob. It also has the ability to display any specific information that may be programmed with the Smart Fob that is unique to the unit, such as tenant information or special requests. The KEYper HC Smart Fob Reader is the perfect add on to increase resident satisfaction, increase operational efficiency and keep your team prepared.

HC Features

SmartFob Technology
Keys are attached to unlabeled, tamper-evident SmartFobs for convenience and security. The small design allows for higher cabinet capacity, and the fobs can be identified in the field.

Digital Camera
For added security, each transaction on the KEYper HC Key System is photographed and time/date stamped for identity verification.

Integrated Touchscreen
A low-profile touchscreen integrated into the front door panel, and easy step-by-step instructions, provide simple access to the kiosk.

Complete Reporting Analytics
View and export comprehensive reports by asset or user, analyze intrusion alerts, and more.

KEYper GO
Mobile Key Reservation

Easily manage your keys from your phone

Application Features
• Key Checkout and Reservation
• Real-time Status of Keys
• SMS Notifications and Alerts
• Lot Location

• Customizable Search Filters
• Restricted to Authorized Users
• Ability to Monitor Asset Limits

How It Works
Download the KEYper GO app to your mobile device. Have a system administrator activate your device, and you are ready to enter the world of mobile key control. Once you are logged into KEYper GO, you can see the real-time status of all keys and assets throughout your entire organization. With the simple touch of a button, you can select keys for immediate check out. You can also reserve them to be picked up at a later time. If the key you are looking for is already checked out to another co-worker, KEYper Go can notify them via SMS message that you are looking for that key. With less time spent checking out keys, you'll have more time to focus on your clients and responsibilities.

The Worlds 1st
Mobile Key Reservation App!

KEYper GO

Get Detailed Vehicle Information Including Lot Location

SMS Notification

Reserve Keys for Quick Checkout
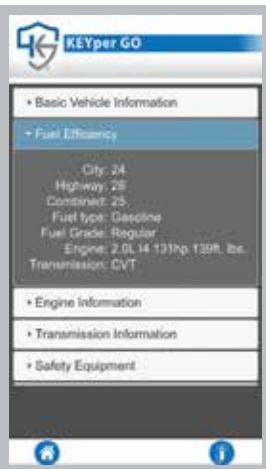

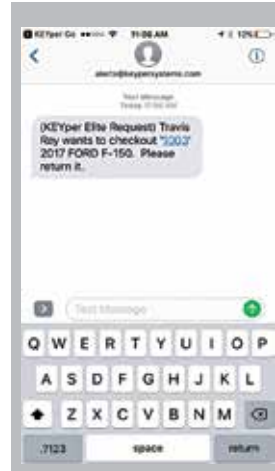

Quickly See Who Has Keys Checked Out

Optional Features

VIN Explosion with Sales Data
Along with standard specs, KEYper GO with VIN Explosion can be configured to provide supplemental sales data for the specific make and model of vehicle (available interior/exterior colors, drive type, engine information, etc.). With that knowledge at your fingertips, you can quickly provide customers the information needed to make a buying decision.

VIN Explosion
KEYper GO with VIN Explosion gives you the ability to access VIN data for vehicles instantly and sync it back to your Electronic Key Management System. Simply scan the VIN using your mobile device. Attributes such as make, model, year, etc., are then extracted and uploaded into the KEYper GO app, without the need for additional integration. View the vehicle data within your app and press a button to transfer it back to your key control system. Eliminate the time spent manually entering vehicle information into your key system, as well as the potential for data entry errors. In addition, KEYper GO with VIN Explosion allows you to add and delete vehicles from your key system directly from the app.

System Requirements:
• KEYper® Elite Series Electronic Key Management System
• Compatible WiFi Network
• Compatible with Apple® and Android™ Devices
• Cellular Access Available

Add & Delete Keys with VIN Explosion

Get Additional Vehicle Data with VIN Decoding

KEYper SCAN
Mobile Inventory Control

## Manage Your Fleet In A Few Easy Steps

Step #1: Label vehicles with weatherproof barcode.

Step #2: Download real-time vehicle data to iPad.

Step #4: Sync data back to key system.

Step #5: View reports from your desktop.

Step #3: Scan vehicles.

KEYperSCAN Benefits:

- **Easy to Use**
- **Easy to Implement**
- **Lowest Cost of Ownership**
- **Flexible**
- **Time-Saving**
- **Best Value Inventory Management System**

Your Inventory. Go Mobile.

It's unbelievably simple. Perfected for the automotive and fleet-management industries, our revolutionary new system uses scanfob and iOS technology to turn your mobile device into a powerful inventory management system. Scan your inventory, sync with your KEYper® Key Management System and generate a variety of reports.

How It Works

As keys are added to the key system, a label with a barcode is generated to be placed on the vehicle. Once all of your vehicles have been labeled, you are ready to use your new KEYperSCAN System. When you are ready to take inventory of your fleet or dealership, you simply download the inventory from your KEYper® Elite Series Key System to your mobile device over your WiFi network. Now you are ready to start scanning. After the scanning is complete, simply sync your KEYperScan System back to the key system over your WiFi network. Now you are ready to view your results.

KEYperScan works hand-in-hand with our Key Management Systems to ensure all your keys and assets are accounted for.

KEYperSCAN Includes:
- **iPad with Case**
- **Elite Software KEYperSCAN App**
- **Barcode Scanner**
- **Zebra Label Printer**

Requirements:
- **KEYper® Systems Elite Series Key Management System**

KEYperScan Label Printer

Choose from our various weatherproof window label styles. Each label printed contains the important information, allowing for quick and easy identification.

Service Express 24

The KEYper® Nite Drop Zone offers your customers the ultimate in after-hours convenience when dropping off keys. Our convenient, reliable and secure Drop Box is the answer to late night or early morning key drop off. It is a simple, smart and affordable way to maintain and control your keys, even when you're not there.

Give your customers the convenience they deserve with the KEYper® Nite Drop Zone. To drop off their keys, users simply complete a convenient envelope, insert their keys, and drop the envelope in the KEYper® Nite Drop Zone. Easy to understand decals explain the key management process. There's no need for a separate mail slot. It's time to avoid lost keys, smudged envelopes, etc.

The KEYper® Service Express 24 is a 24-hour automated key box dispensing system that works much like an ATM. It's a perfect solution for service departments and rental property management offices

1. The service advisor or manager places the keys inside the system.
2. The customer uses a personal code to retrieve the keys.

Installation is simple: All KEYper® SE24 key box models can be easily installed onto any wall surface with our three-bolt mounting system. All three mounting bolts are hidden and can only be accessed from inside the unit.

Two Model Sizes
The KEYper® SE24 key box is available with as few as 20 key actuators, and as many as 40, to accommodate any service facility and any budget. These two models share the same powerful software features.

How Does It Work?
Customers simply enter a five-digit PIN (Personal Identification Number supplied by you or your customer) and the KEYper® SE24 key box dispenses the keys, displays directions to their vehicle, and they are on their way in less than ten seconds. Using this key box is that easy. Warranty customers will appreciate the "no-hassle, no wait" convenience the system provides. The KEYper® SE24 key box can also be used to pick up loaner vehicles and is a great tool for "off site" or "mobile service operations" at business complexes. Rental property management offices can utilize the KEYper® Service Express key box to offer safe and secure key pickup after office hours. You protect not only the property owner, but provide peace-of-mind to the renter by demonstrating the seriousness with which you regard key security and accountability.

Service Advisor or Management Tracking
The key box software provides for a single "administrator" code with full access to software functions. In addition, you can have up to ten "service advisor" codes allowing limited access to software functions. The key box system will track customer PIN codes entered by each advisor, and will report PIN codes that have been incorrectly entered by the customer. A report detailing the last 200 transactions, along with overall usage statistics, is available based on quarterly, bi-annual, yearly, and life of the system.

Transaction Reliability
The KEYper® SE24 key box is designed to provide maximum reliability in all weather conditions. The system has been tested in simulated conditions of blowing rain, dust, vibration, humidity, and extended temperatures from -40°F to 158°F (-40°C to 70°C). In the event of a power loss, the system is smart enough to remember all advisor codes, PIN codes and message screens until power is restored.

Product Specifications:
- Heavy duty ¼ inch steel construction with durable powder coat finish
- Weather resistant
- No worry, theft resistant design. Once envelope is deposited into the vault it cannot be removed without the key.
- Convenient, pull-down writing surface uses gas props to assist motion.
- Easy, bolt-through wall installation
- Dimensions: 22"H x 19"W x 12"D
- Weight: 70 lbs. (UPS shippable)

Mechanical Key Systems Specs

KEYper® Mechanical key management systems are an effective, low-cost solution for your key control challenges.

• Patented system
• Simple to install, use and manage
• Improves productivity and reduces costs of lost keys/assets
• Provides instant visual of checked out keys and the users who removed the keys
• Available in a single control module
• Expandable in 5-key modules from 5, 10, 15 up to 150 keys
• Great for managing items such as tools, dealer plates and even hand-held scan devices

How It Works:

• Each key is locked onto a KEYper® Key Plug using a tamper proof seal, and the key plug is locked into the left port of each key location on the board.

• Authorized users insert their personalized access peg into the right port of the desired key and turn to release the keys for removal. Their access peg remains locked into the system until they return the key plug back to the board.

• To return the key plug with the key, insert the key plug back into the left port and then turn the access peg, locking the key plug back into the correct location.

• Access pegs can be engraved with numbers or initialled for increased accountability.

MADE IN THE USA GSA

The KEYper® Systems commitment to asset management doesn't stop at keys. Systems are available for padlock management, allowing you to control access to your padlock inventory.

Keeping locks readily available at all times can be challenging. With KEYper® Key Lockbox Management Systems, padlocks can be at arm's reach at all times. Know how many locks are checked out of the system and who has them, at a glance.

KEYper® Padlock Management Systems allow your safety division to provide a padlock station at the point of need, while keeping the padlocks secure. Compliment your lockout/tagout program with a padlock management system. Your employees will use their personalized access peg to remove a padlock from the system, which retains their access peg until the padlock is returned.

From single key lockbox stations, to systems for up to 75 padlocks, with and without locking enclosures, the KEYper® Key Lockbox Management System can be customized to meet the needs of your facility. By tracking both the padlock and its keys, you can be assured a lock and key is available to meet your OSHA LOTO mandated procedures.

Asset Control

We can secure many types of assets including: tools, scan guns, tablets/cell phones, guns, dealer plates, and oversized fobs. Let us design a custom asset management solution for you.

Trusted by Industry Leaders
KEYper® Systems serves 23 out of the 25 largest automotive groups in the United States, as well as some of the largest multi-family housing companies, plus numerous government and military institutions. We are an official supplier to the U.S. government, **GSA-Approved #GS-07F-0771X**. We have extensive experience in working with clients and distributors from across the globe.

Streamlined Asset Control
KEYper® Systems simplifies and streamlines asset control. Our systems promote employee accountability, provide tight security, reduce your liability, and protect your bottom line. We also offer robust analytics for the continuous optimization of your system.

Custom Solutions with Full Support
KEYper® Systems closely works with each client to develop a custom solution, drawing from a complete product line of mechanical, electronic and hand-held solutions. Touch screen systems include built-in biometric, PIN code or card swipe technology. Every solution is backed by a full-year warranty and supported by industry-leading, 24/7 customer support, including online diagnostics and real-time problem resolution.

Open-Door Manufacturing Tours & Product Demos
KEYper® Systems world headquarters is located in Harrisburg, North Carolina. We invite prospective clients to tour our manufacturing facilities and participate in interactive product demonstrations. Virtual product demonstrations are also available. To get started, simply give us a call.
