

This Top 100 Auto Dealer Group  
Immediately

# Saved \$1,000,000

in annual health insurance premiums

LevelFunded Health immediately saved an auto dealer group with 500 employees over \$1,000,000 in annual health insurance premiums overnight, with the potential for an additional \$500,000 in refunds by the end of the year, by moving them from a United Healthcare fully-insured health insurance program to an A-rated Fortune 100 level-funded program.

Premiums were dramatically reduced through the use of medical underwriting available under ERISA law, while employee benefits were significantly improved. Ultimately, this program and form of underwriting not only reduced expenses for the business, but also helped them retain and hire their best employees.
