## SHOP SUPPLIES - AUTO & BODY SHOP

**Confidential - For Program Use Only**

This is a sample of the products and services that are provided by this Supplier

DESCRIPTION	PART #	QTY	PRICING
<b>Briefly describe any compliance programs you have available?</b>	Yes. MSC has an Environmental Compliance and Sustainability Department, which houses an environmental affairs program. There is a Sustainability team within this department that works on projects specific to corporate sustainability, environmental awareness, Earth Day events, etc. Sustainability concepts such as pollution prevention and resource consumption are covered within our environmental policy.		
<b>Briefly describe your obsolescence program?</b>	MSC Obsolescence Program: The VMI program offers an Obsolescence Program (OA) that can be utilized to reduce inventory levels regarding obsolete products and/or products that are at inventory levels that need to be adjusted down. We would properly discard or otherwise dispose of agreed upon list of Obsolete Parts in return for credit. The credit is to be applied against future purchases from the VMI Pro Services program at the rate and conditions agreed upon at the onset. We offer a 5% credit deducted for every \$1.00 in purchases on subsequent invoices until the total credit amount stated on the agreement has been applied. The OA is generated on a site by site basis and cannot be transferred between sites.		
<b>Briefly describe training programs?</b>	As many of our suppliers represented in the MSC catalog are part of our program, they offer additional technical support. Many of these suppliers have MSC dedicated resources that work specifically with MSC field personnel to support our customers. Additionally, MSC has over 200 in-house product experts to work directly with our customers. We offer free product training in conjunction with our suppliers. Some examples of other free training programs and/or services include: Fall protection training; Lock Out/Tag Out Inspections; Harness Inspections; Ladder Safety Training; General Safety Training; Product Use Training; Hand Tool Safety Training; Power Tool Safety Training; Lifting Safety Training; Chemical Storage Safety Training and Inspections; Plant Signage Inspections; Confined Spaces Breathing Training; and Arc Flash Training.		
<b>Briefly describe our next steps in implementing your solution?</b>	MSC would conduct a Site Survey to determine service schedule, number of sku's, delivery requirements and find out order life cycle process. Next meeting we would present findings of Site Survey, develop customer program based on requirements and then schedule roll out plan and implementation.
