# Payroll

Dominion offers intuitive, accurate payroll that syncs with the rest of your platform. As your employees log hours, request time off, and undergo open enrollment, Dominion's payroll automatically updates these changes accordingly, with zero spreadsheets required. It's reliable, precise, and flexible.

A Single Platform
Manage your payroll on the same platform as your Time & Attendance and HR. Any changes you make in payroll will be reflected across the platform.

Automatic Tax Filings
Upon accepting your payroll preview, Dominion automatically sends your tax payments on your behalf. This eliminates any need to worry about all local, state, and federal taxes.

Preview Your Payroll
Prior to accepting your payroll, you'll receive a preview that allows you to make any last minute adjustments and review all deductions, reports, and check stubs.

Payroll History Dashboard
Once you have processed payroll and accepted the preview, you'll receive a Payroll History dashboard that allows you to review some key information related to your closed payroll.
